REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the combination of the limitations of "...a speed control module for controlling the speed and timing of the rotation of the supporting structures; a pallet assembly having a perch bar supporting structure, the perch bar supporting structure including perch bars; a shackle assembly movably affixed to the pallet assembly, the shackle assembly comprising a pair of non-rigid grippers; a trap bar assembly, the trap bar assembly rotatably affixed to the pallet assembly; a shackle control mechanism affixed to the shackle assembly, the shackle control mechanism configured to lock and release the shackle assembly from the pallet assembly; a trolley configured to move in an x-translational direction, the trolley affixed to the pallet assembly; and said pallet assembly comprising a bottom panel, a first side panel hingedly connected to a side of said bottom panel, and a second side panel hingedly connected to a side of said bottom panel at a location opposite to the first side panel..." in claim 1, the combination of the limitations of "...wherein the pallet assembly is configured to include rollers for traversing on a conveyor, the pallet assembly further being configured to travel along a separate track of the conveyor from a track of the conveyor utilized by the trolley; wherein the conveyor further comprises a drop cam; wherein the shackle control mechanism further comprises a shackle stopper and a shackle releaser, and wherein the shackle stopper and shackle releaser provide for a move or stop control in both an x and z-direction; and wherein the shackle assembly further comprises an x-motion guide configured to mount a trap-bar cam profile, magnetic lock and linear bearings that guide the shackle assembly in an x-direction, and z-motion guide rods on which the pair of compliant grippers and a shackle motion

control rod are affixed...” in claim 28 and the combination of the limitations of “...a first speed control module for controlling the speed of a conveyor; a second speed control module for controlling the speed and timing of the rotation of the pair of rotating hands in relation to speed of the conveyor; a pair of counter rotating support structures configured to compel the live object in an x-translational direction at an x-translational speed, each supporting structure including an upper portion and a lower portion, and wherein the upper portion includes a plurality of apertures having a first configuration and the lower portion includes a plurality of apertures having a second configuration; a compliant finger disposed within each of the plurality of apertures, the pair of counter rotating supporting structures are further configured to provide an opening for receiving the live object and wherein the compliant fingers are further configured to grasp and hold a body of the live object; a speed control module for controlling the speed and timing of the rotation of the supporting structures; and said pallet assembly comprising a bottom panel, a first side panel hingedly connected to a side of said bottom panel, and a second side panel hingedly connected to a side of said bottom panel at a location opposite to the first side panel...” in claim 33 all are not found in the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
